

WARNING: IF YOU ARE TRANSGENDER, THIS DICTIONARY MAY CAUSE YOU IRREVERSIBLE PSYCHIC DAMAGE

I have been putting together this *work-in-progress* dictionary or glossary of 4tran terminology as a fun little project due to a weird fascination with this terrible subculture.

I suspect there may also be some potential inaccuracies within my definitions as, unfortunately, I have not yet reached the maximum possible level of brain worms. So, if you have any information, suggestions, or corrections, please let me know!

- **Brainworms** - The often unintentional internalization of transphobic ideas and terms that results from consuming harmful content. Within the context of 4chan, it refers to the increased dysphoria, body dysmorphia, and general insanity that commonly occurs when you start using and understanding absurd terms such as “*Gorillamoding AGP Giga-rapehons*”. This entire dictionary will likely give you some amount of brain worms. More succinctly, brainworms are internalized transphobic ideas common to 4chan and adjacent communities, propagated by trans people.

- **Tranner** - A trans person, especially an MTF trans person. Originates from 4chan and typically refers to trans people from 4chan specifically, mimicking 4chan slang "channer".
- **Transgender** - A person who does not identify with the gender they were assigned at birth and takes efforts to transition into the gender they do identify with, which may include social, legal, and medical transition. Transgender is a more modern term coined in the 80s and popularized in the 90s to help bridge the transsexual and transvestite communities, by recognizing commonalities between them and enabling "transvestites", formerly barred from receiving HRT due to not wishing to pursue bottom surgery, to undergo medical transition through the insurance system.
- **Transsexual** - An older term for trans people coined by Magnus Hirschfeld, who first documented trans people in the West. Transsexual people experience a gender

identity that is inconsistent with their assigned sex and desire to permanently transition to the sex with which they identify, seeking medical assistance to help them align their body with their identified sex or gender. Formerly used to refer to only trans people who pursued bottom surgery, currently used more flexibly to refer to anyone who medically transitions.

- **Transvestite** - Transvestism is the practice of dressing in a manner traditionally associated with the opposite sex. An older term for trans people coined by Magnus Hirschfeld, to distinguish between Transsexuals, who were interested in pursuing bottom surgery and medical transition, and those who merely dressed up as the opposite sex.

Transsexualism was used to refer to those who were interested in the sex of the opposite gender, and transvestism was used to refer to interest in the clothes of the opposite gender.

Many people formerly considered Transvestites did identify as the opposite gender, and did undergo hormone replacement therapy. The term Transgender was later coined to bridge the gap in the community in order to refer to everyone who identified as the opposite gender, rather than separating between sex and clothes.

should thus be treated as such. Truscums often hate people who hold beliefs such as gender being a social construct and xenogenders being valid.

- **Tucute** - Short for "too cute to be cis", a term used by truscum transmedicalists to imply any non-dysphoric or xenogender trans people aren't real trans people and are just identifying as trans to be "cute" or "trendy." Usually applied to afab nonbinary people or non-transitioning trans men.
- **Trutrans** - A person who believes themselves to be genuinely transgender in contrast to other people who are believed to be faking.
- **Trender / Transtrender** - A person accused of claiming a trans identity to be fashionable, rather than because they are actually transgender. They are often said to not experience any real discomfort with their assigned gender and often do not take active measures to pass as the gender they identify as. Xenogender people are also commonly accused of being tenders.
- **Hugboxing** - A pejorative term for affirming someone regardless of their appearance. Hugboxing is a type of Toxic Positivity, where negativity, criticism, or concern is not allowed, even when it is specifically requested by the subjects being discussed. Many trans people develop brainworms due to seeking more edgy communities out of a distaste for communities that hugbox.

BLANCHARD

- **Blanchard** - A sexologist who is largely discredited within mainstream science. He came up with a typology of trans women that breaks them into Autogynephilia (AGP) and Homosexual Transexual (HSTS).

- **AGP** - Autogynephilia, a pseudo-scientific term that is part of Blanchard's typology of transsexuals. Purports that trans women who are bisexual, asexual, or attracted to women transitioned primarily to fulfill their sexual fetish of being perceived as a woman.
- **HSTS** - Homosexual Transexual, a pseudo-scientific term that is part of Blanchard's typology of transsexuals. Under his typology, Homosexual Transexuals are supposedly homosexual people who transition in order to attract straight partners. Ie. lesbians who transition to men to attract straight women, or gay men who transition to women to attract straight men.
- **Erotic Target Location Error** - A hypothetical paraphilia relating to arousal at the idea of one's self as something else, such as autogynephilia or autoandrophilia.
- **Meta-Attracted** - A part of Blanchard's pseudoscientific typology of transsexuals. Proposes that bisexual trans women are autogynephilic straight men that only appear to be attracted to men, because they are actually fulfilling the sexual fetish of seeing themselves in a feminine sex role. This helps make Blanchard's typology unfalsifiable by proposing that exceptions to it are simply lying.
- **AAP** - Autoandrophillia, a pseudo-scientific term that is part of Blanchard's typology of transsexuals. Blanchard does not believe this is real, and proposed it merely to satisfy a gender parity with AGP. The paraphilic tendency of someone assigned female at birth to be sexually aroused by the thought of becoming a male.

PEOPLE

John, a 50 year-old genetic male, medical research scientist, married (23 years), father of three children aged 20, 17 and 7, phoned me after experiencing a panic attack severe enough to require emergency attention from paramedics at the airport on his way to give a presentation at a conference. John gave me only his first name and informed me that I was the first to be told what he was about to tell me. He said he was "gender dysphoric" and that he was "desperate." Feelings that were once "controllable through sheer force of will," had increased to where he now was having protracted periods where he would close his office door, lie on the floor and weep quietly while curled up in the fetal position, holding his genitals in pain. Other than intrusive and repeated fantasies of being female, he had refused to allow himself any overt form of female gender expression. He reported feeling that if he was to cross-dress and be caught, he would dishonor his wife and family.
